

## Decoding Digital Literacy

**Aim:** This fellowship will lead change by building a shared understanding of digital literacy and developing a digital literacy benchmark for students entering and graduating from Australian higher education.

### Why is this important?

- Industry demands that graduates have good digital literacy skills
- The benchmark will bridge the gap between school skills and workplace skills.
- It will provide the grounding and insight for disciplines to develop digital literacy graduate learning outcomes in their context.

### Who will benefit?

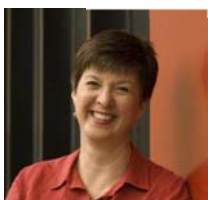

Higher education students and academics.

### Who will contribute?

Academics, students and industry representatives.

### What are the outcomes?

- A common understanding of digital literacy
- A benchmark for digital literacy capabilities
- An agreed digital literacy graduate learning outcome

Associate Professor Jo Coldwell-Neilson  
School of IT, Deakin University  
Geelong.
